## 40V N-Channel Power MOSFET

<p><b>Description</b></p> <p>N-Channel Power MOSFET designed by HR-Micro Semiconductor Company, according to the advanced Trench Technology. This devices provide an excellent gate charge and <math>R_{DS(on)}</math>, which leads to extremely communication and conduction losses. So it is very suitable for AC/DC power conversion, load switch and industrial power applications.</p>																									
<p><b>Features</b></p> <ul style="list-style-type: none"> <li>• Low FOM <math>R_{DS(on)} \times Q_{gd}</math></li> <li>• 100% avalanche tested</li> <li>• Easy to use/drive</li> <li>• RoHS compliant</li> </ul>																									
<p><b>Applications</b></p> <ul style="list-style-type: none"> <li>• AC/DC Converter</li> <li>• Battery Protection Charge/Discharge</li> <li>• Load Switch</li> <li>• Synchronous Rectification</li> </ul>	 																								
<p><b>Key Performance Parameters</b></p>

Absolute Maximum Ratings $T_A = 25^\circ\text{C}$ , unless otherwise noted			
Parameter	Symbol	Values	Unit
Drain-Source Voltage( $V_{GS}=0\text{V}$ )	$V_{DS}$	40	V
Continuous Drain Current <sup>2)</sup>	$I_D$	120	A
$T_C = 100^\circ\text{C}$		76	
Pulsed Drain Current <sup>3)</sup>	$I_{D,pulse}$	330	A
Gate-Source Voltage	$V_{GSS}$	$\pm 20$	V
Single Pulse Avalanche Energy <sup>1)</sup>	$E_{AS}$	480	mJ
Power Dissipation	$P_D$	113	W
Operating Junction and Storage Temperature Range	$T_J, T_{stg}$	-55~+150	°C

Thermal Resistance			
Parameter	Symbol	Max.	Unit
Thermal Resistance, Junction-to-Case	$R_{thJC}$	1.1	°C/W
Thermal Resistance, Junction-to-Ambient	$R_{thJA}$	62	°C/W

#### Notes

- 1)  $L=0.5\text{mH}$ ,  $V_{DD}=20\text{V}$ , Start  $T_J=25^\circ\text{C}$ .
- 2) Limited by maximum junction temperature.
- 3) Repetitive Rating: Pulse width limited by maximum junction temperature and package.

<b>Electrical Characteristics</b> $T_J = 25^\circ\text{C}$ , unless otherwise noted						
<b>Parameter</b>	<b>Symbol</b>	<b>Test Conditions</b>	<b>Value</b>			<b>Unit</b>

## Disclaimer

HRM has made reasonable commercial efforts to ensure that the information given in this datasheet is correct. However, it must clearly be understood that such information is for guidance only and does not constitute any representation or form part of any offer or contract.

For documents and material available from this datasheet, HRM does not warrant or assume any legal liability or responsibility for the accuracy, completeness, or usefulness of any information, product, technology or process disclosed hereunder.

HRM reserves the rights to at its own discretion to make any changes or improvements to this datasheet. Unless said datasheet is incorporated into the formal contract, any customer should not rely on the information as any specification or product parameters duly committed by HRM. Customers are hereby advised to verify that the information contained herein is current and complete before the entering of any contract or acknowledgement of any purchase order. Accordingly, all products specified hereunder shall be sold subject to HRM's terms and conditions supplied at the time of order acknowledgement. Except where agreed upon by contractual agreement, testing of all parameters of each product is not necessarily performed.

HRM does not warrant or convey any license either expressed or implied under its patent rights, nor the rights of others. Reproduction of information contained herein shall be only permissible if such reproduction is without any modification or alteration. Reproduction of this information with any alteration is an unfair and deceptive business practice. HRM is not responsible or liable for such altered documentation.

Resale of HRM's products with statements different from or beyond the parameters stated by HRM for that product or service voids all express or implied warranties for the associated HRM's product or service and is unfair and deceptive business practice. HRM is not responsible or liable for any such statements.

HRM's products are not authorized for use as critical components in life support devices or systems without the express written approval of HRM. As used herein:

1. Life support devices or systems are devices or systems which, (a) are intended for surgical implant into the body, or (b) support or sustain life, and whose failure to perform, when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in a significant injury to the user.
2. A critical component is any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.
